

28.08.2018 Replacing a Cylinder-head Gasket: New Assembly Video by Dana at Automechanika

The expert removal of a defective cylinder-head gasket and the successful installation of a new one is a critical discipline in engine repair. Dana will present a new Victor Reinz® assembly video, "Replacing a cylinder-head gasket," at Automechanika 2018 in Frankfurt am Main.

The seven-minute video shows the necessary step-by-step work processes – from removing the cylinder-head and cleaning the sealing surfaces, to tightening the new cylinder-head bolts. The short film can be used internationally because it works completely without speakers and text fadeins. Icons indicate safety-related information and important tips.

The complete assembly is carried out by the well-known expert, Victoria. The video is a seamless continuation of the successful series, "Victoria's practical tips," now with a total of six episodes. All videos are available on the YouTube Channel VictorReinzSealing, or on the website www.victorreinz.com/victoria.

Professional replacement of a cylinder head gasket (available from September 2018)

Automechanika is an important aftermarket event for Dana. In 2016, the fair in Frankfurt am Main posted record figures with 136,000 visitors from

170 countries and 4,820 exhibitors. This year, Automechanika will take place from 11 to 15 September. Dana's booth G91 is located in hall 3.0.

Visitors can also look forward to a specially prepared BMW V8 engine and an Ultimate Dana 60™ crate axle solution from Dana.

The BMW engine impressively demonstrates Dana's Victor Reinz® sealing products utilizing reliable gaskets across the engine – from the cylinderhead gasket to various secondary gaskets. Victor Reinz gaskets are also suitable for use in heavy-duty and off-highway vehicles.
